Проблема (общедоступное)

You need to remove your graphics card driver using Display Driver Uninstaller

Решение (общедоступное)

Display Driver Uninstaller works with NVIDIA, AMD and Intel drivers, and in order to remove a driver from your system you need to follow these steps:
Connect to a PC with VNC/AnyDesk or directly with a keyboard and a mouse;

Download the latest version of [1]Display Driver Uninstaller.
The tool will be downloaded as a 7zip archive. Locate the downloaded file and double click it.[2]

Now you'll be asked to extract the tool. Choose the extract location and click Extract.
Press the Windows logo key + R / open Start menu;
Type msconfig in the Open box and then select OK;
Select the Boot tab;
Under Boot options, select the Safe boot checkbox;
Press OK;
Agree with Reboot;
Go to C:\Users\gamer\Downloads\DDU vXX.X.X.X\ where vXX.X.X.X is your DDU Version

Run Display Driver Uninstaller.exe;

Follow the steps below:

After the PC restarts, your display driver will be completely removed, and all driver-related issues with your graphics card will be resolved. Now you just need to install a new driver for your graphics card.
